Jeffries Wyman Special Issue

BIOPHYSICAL CHEMISTRY
Volume 37, No. 1–3, 31 August 1990

CONTENTS

Announcement from the Publisher v

Foreword
E. Di Cera 1

Jeffries Wyman: Scientist, Philosopher and Adventurer
J.T. Edsall (U.S.A.) 7

Is symmetry conservation an unessential feature of allosteric theory?
C. Debru (France) 15

Frequency of abnormal human haemoglobins caused by C → T transitions in CpG dinucleotides
M.F. Perutz (U.K.) 25

Differential scanning calorimetric studies of *E. coli* aspartate transcarbamylase. III. The denaturational thermodynamics of the holoenzyme with single-site mutations in the catalytic chain
D.S. Burz, N.M. Allewell, L. Ghosaini, C.Q. Hu and J.M. Sturtevant (U.S.A.) 31

A possible new control mechanism suggested by resonance Raman spectra from a deep ocean fish hemoglobin
J.M. Friedman, B.F. Campbell and R.W. Noble (U.S.A.) 43

Perturbation of molecular species distribution in steady states supported by a flow of energy. Models analogous to Ca^{2+}-dependent ATPase and phosphorylase *b*
E. Bucci and R.F. Steiner (U.S.A.) 61

A photoacoustic calorimetric study of horse myoglobin
J.A. Westrick and K.S. Peters (U.S.A.) 73

On the kinetics of suicide substrates
M.A. Burke, P.K. Maini and J.D. Murray (U.K., U.S.A.) 81

An analytic model for kinetics of hemoglobin reacting with ligand
P.E. Phillipson (U.S.A.) 91

Regulation and quaternary structural changes in rabbit muscle phosphofructokinase
G.-Z. Cai, L.L.-Y. Lee, M.A. Luther and J.C. Lee (U.S.A.) 97

The Glu 2^- ··· Arg 10^+ side-chain interaction in the C-peptide helix of ribonuclease A
R. Fairman, K.R. Shoemaker, E.J. York, J.M. Stewart and R.L. Baldwin (U.S.A.) 107

A simple model for solvation in mixed solvents. Applications to the stabilization and destabilization of macromolecular structures
J.A. Schellman (U.S.A.) 121

A possible new mechanism of oxygen affinity modulation in mammalian hemoglobins
C. Fronticelli (U.S.A.) 141

Thermodynamics of local linkage effects. Contracted partition functions and the analysis of site-specific energetics
E. Di Cera (U.S.A.) 147

Proton tunneling in hydrated biological tissues near 200 K
G. Careri, G. Consolini and F. Bruni (Italy, U.S.A.) 165

Oxygen binding to partially oxidized hemoglobin. Analysis in terms of an allosteric model
L. Cordone, A. Cupane, M. Leone, V. Militello and E. Vitrano (Italy) 171

Amino acid substitutions which stabilize aspartate transcarbamoylase in the R state disrupt both homotropic and heterotropic effects
J.O. Newell and H.K. Schachman (U.S.A.) 183

Precision determination and Adair scheme analysis of oxygen equilibrium curves of concentrated hemoglobin solution. A strict examination of Adair constant evaluation methods
K. Imai (Japan) 197

What the intermediate compounds in ligand binding to hemoglobin tell about the mechanism of cooperativity
M. Perrella, A. Colosimo, L. Benazzi, M. Ripamonti and L. Rossi-Bernardi (Italy) 211

High-performance liquid chromatography of globin chains in the identification of human globin gene abnormalities
B. Masala and L. Manca (Italy) 225

Consequences of neglecting the hemoglobin concentration on the determination of Adair binding constants
M.L. Johnson and A.E. Lassiter (U.S.A.) 231

Thermodynamic analysis of the transcription cycle in *E. coli*
S.C. Gill, T.D. Yager and P.H. von Hippel (U.S.A.) 239

Horse heart myoglobin reconstituted with a symmetrical heme. A circular dichroism study
R. Santucci, F. Ascoli, G.N. La Mar, D.W. Parish and K.M. Smith (Italy, U.S.A.) 251

Nested allostery in scorpion hemocyanin (*Pandinus imperator*)
H. Decker (F.R.G.) 257

Analysis of hemoglobin oxygenation from combined equilibrium and kinetic data. Is quaternary enhancement necessary?
G.K. Ackers and M.L. Johnson (U.S.A.) 265

Thermodynamics of oxygen binding to arctic hemoglobins. The case of reindeer
B. Giardina, S.G. Condò, R. Petruzzelli, A. Bardgard and O. Brix (Italy, Norway) 281

A cooperative hemoglobin with directly communicating hemes. The *Scapharca inaequivalvis* homodimer
E. Chiancone, D. Verzili, A. Boffi, W.E. Royer, Jr and W.A. Hendrickson (Italy, U.S.A.) 287

Effect of aromatic isothiocyanates on the functional properties of human hemoglobin. Role of the stereochemistry of the charged group
R. Ippoliti, D. Currell, E. Lendaro, A. Bellelli, M. Castagnola, M. Bolognesi and M. Brunori (Italy, U.S.A.) 293

Calorimetric determination of linkage effects involving an acyl-enzyme intermediate
D.W. Bolen and J.L. Slightom (U.S.A.) 303

Effects of anions on the molecular basis of the Bohr effect of hemoglobin
M.R. Busch and C. Ho (U.S.A., Republic of China) 313

Comparative least-squares analysis of hemoglobin oxygen equilibrium curves
D. Myers, K. Imai and T. Yonetani (U.S.A., Japan) 323

Allosteric regulation, cooperativity, and biochemical oscillations
A. Goldbeter and G. Dupont (Belgium) 341

Bovine trypsinogen activation. A thermodynamic study
M. Coletta, P. Ascenzi, G. Amiconi, M. Bolognesi, M. Guarneri and E. Menegatti (Italy) 355

Fitting abnormal oxygen equilibrium curves of hemoglobin
M.C. Marden, J. Kister and C. Poyart (France) 363

The energetics of ligand-linked subunit assembly in hemoglobin require a third allosteric structure
G.K. Ackers (U.S.A.) 371

Oscillations in cell morphology and redox state
G. Visser, C. Reinten, P. Coplan, D.A. Gilbert and K. Hammond (Republic of South Africa) 383

Nonlinear optical effects in oxygen-binding reactions of hemoglobin A_0
D.W. Ownby and S.J. Gill (U.S.A.) 395

^{31}P-NMR investigation of trimethylphosphine binding to [αFe(II),βMn(II)] hybrid hemoglobin. A model for partially liganded species
A. Bondon and G. Simonneaux (France) 407
